

11.Shoulder

Measure between your shoulders (A) (where the sleeve starts). The measuring tape should be close to the lowest part of the shirt's neck (B).

12.Sleevelength

Measure from the shoulder's seam (A) all along the arm to the thumb bone (B).

13.Trouser length

Take the measurement of the trouser length from the top of the waistband down to the floor.

14. Waistband

It is best if you wear comfortably fitting trousers and take the measurement directly above the waistband. Make sure that the measuring tape is held closely to the body while measuring.

15.Crotch length

Pass the measuring tape from the upper waistband at the front through the crotch to the upper waistband at the back to measure the length of your crotch. Make sure that the measuring tape is held closely to your body while measuring.

16.Thigh

Take the measurement at the fullest part of your thigh right below the crotch. Pass the tape loosely around the thigh so that there is enough space for one finger between tape and thigh.

17.Knee

Take the measurement at the widest part of your knee.

18.Trouser hem

The width of the trouser hem is measured around the back of your heel to the desired position on the front.
